Across U.S. Companies, Tax Rates Vary Greatly

Last week, in a Congressional hearing, Apple got grilled for its low-tax strategy. But not every business can copy that approach. Here is a look at what S.&P. 500 companies paid in corporate income taxes — federal, state, local and foreign — from 2007 to 2012, according to S&P Capital IQ. Related Article »

Across U.S. Companies, Tax Rates Vary Greatly

Last week, in a Congressional hearing, Apple got grilled for its low-tax strategy. But not every business can copy that approach. Here is a look at what S.&P. 500 companies paid in corporate income taxes — federal, state, local and foreign — from 2007 to 2012, according to S&P Capital IQ. Related Article »

Natural language processing (NLP)

Information visualization (InfoVis)

Output modality:

Which information is shown?

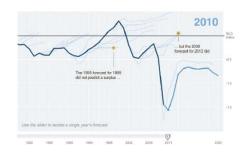

Topic modeling

Sentiment analysis

Text summarization

Text generation

Mining and summarizing text

Creating visual representation of data

Input modality:

How to search for information?

Find me a good Italian restaurant Q

Natural language question answering

Mouse and touch interactions

- Visual text analytics
- Natural language interfaces for visualizations
- Text generations for visualizations
- Automatic visual story generation
- Visualization retrieval and recommendation etc.

- Visual text analytics
- Natural language interfaces for visualizations
- Text generations for visualizations
- Automatic visual story generation
- Visualization retrieval and recommendation etc.

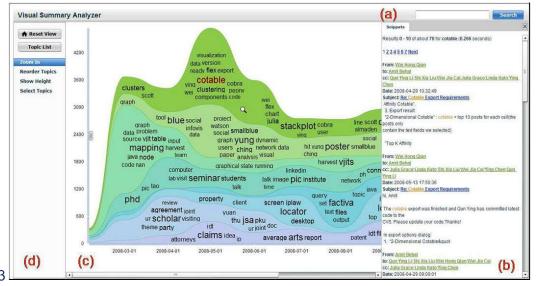

Visual Text Analytics

Tightly integrates text analytics with Visualization

Obama's Health Care Speech to Congress, 2009

Visual Text Analytics

Various tasks:

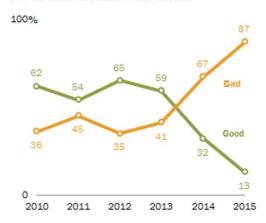

- Understand
- Summarize
- Sentiment analysis
- Argument analysis
- Fact-check
- Rumor detection
- Plagiarism detection
- Abusive comments detection
- Topic controversy detection
- etc.

- Visual text analytics
- Natural language interfaces for visualizations
- Text generations for visualizations
- Automatic visual story generation
- Visualization retrieval and recommendation etc.

Natural Language Interfaces for Visualizations

Rapid Decline in Brazilians' Assessment of Economy

Current economic situation in Brazil is ...

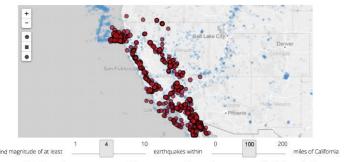

Question: Which year has the most divergent opinions about

Brazil's economy? Answer: 2015

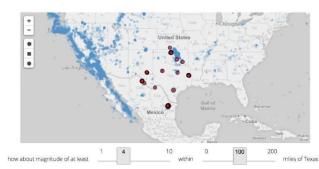

Question: What is the peak of the orange line?

Answer: 87

ChartQA (Masry et al., ACL 2022)

(a) Previous query: "Large earthquakes near California"

(b) Subsequent query: "how about near Texas?"

Eviza (Setlur et al., UIST 2016)

Natural Language Interfaces for Visualizations

Use natural language as an input modality to facilitate data analysis. Benefits:

People can express information needs easily through language

Lower the threshold of required analytical skills

Reduce cognitive burden

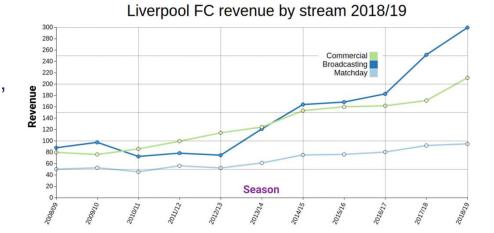

Can improve chart accessibility

- Visual text analytics
- Natural language interfaces for visualizations
- Text generations for visualizations
- Automatic visual story generation
- Visualization retrieval and recommendation etc.

Text Generations for Visualizations

Generate texts to explain key insights from a chart

Broadcasting is the largest source of revenue for Liverpool FC. In 2018/2019, the club earned approximately 299.3 million euros from broadcasting, more than triple than in 2010/2011. The second biggest revenue stream is the commercial one.

Text Generations for Visualizations

Automatically summarize key data insights using texts. Benefits:

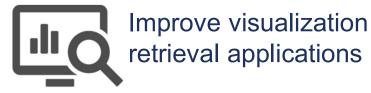

Help readers in understanding data insights

Suggestions for writing data-driven articles

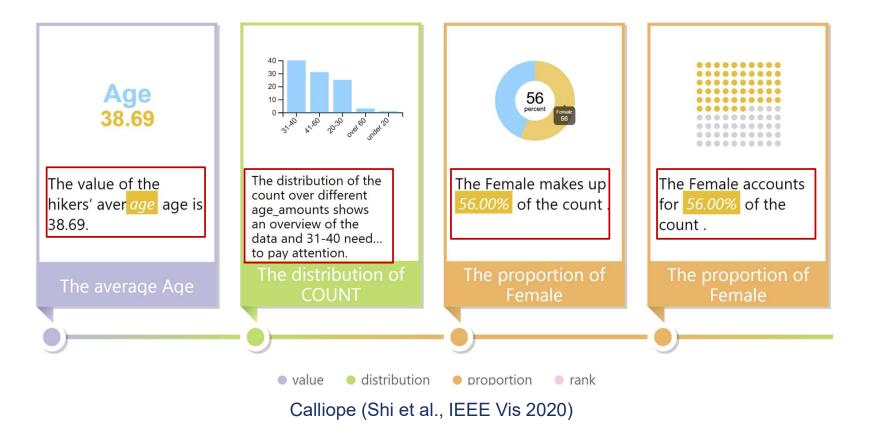

Can improve chart accessibility for people who are blind

- Visual text analytics
- Natural language interfaces for visualizations
- Text generations for visualizations
- Automatic visual story generation
- Visualization retrieval and recommendation etc.

Automatic Visual Data-driven Story Generation

Shi D, Xu X, Sun F, Shi Y, Cao N. Calliope: Automatic visual data story generation from a spreadsheet. IEEE TVCG. 2020 Oct 13;27(2):453-63.

- Visual text analytics
- Natural language interfaces for visualizations
- Text generations for visualizations
- Automatic visual story generation
- Visualization retrieval and recommendation etc.

Visualization Retrieval and Recommendation

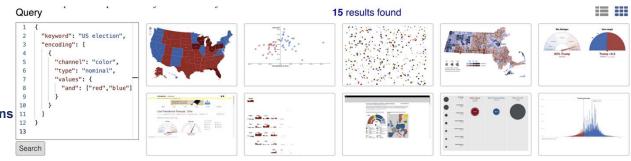

Compute Text-based similarity for retrieval and recommendation

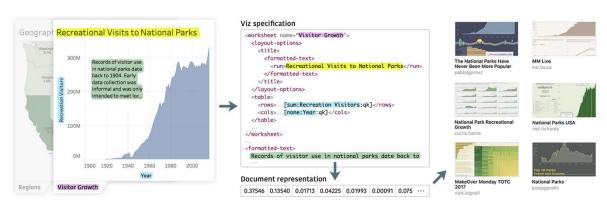

Enamul Hoque, Maneesh Agrawala

Searching the Visual Style and Structure of D3 Visualizations

IEEE Vis 2019.

Michael Oppermann, Robert Kincaid, and Tamara Munzner, VizCommender: Computing Text-Based Similarity in Visualization Repositories for Content-Based Recommendations, IEEE VIS Conf. (VAST), TVCG, 27(2): 495-505, 2020.
